## 11. Numerical Features of Joshua 1-8 and 24

The present sample survey of the numerical features of the book of Joshua might suggest that it is not as meticulously planned numerically as the books of the Pentateuch. Quite the contrary, however, there is abundant evidence to show that the two divine name numbers **17** and **26** have been used to give prominence to certain crucial passages in the story of the occupation of the land. Since these numbers represent the divine name, they symbolically signify YHWH's presence, particularly in the events highlighted in this way. I expect that a comprehensive logotechnical analysis of the whole book will confirm the conclusion based on the sample survey.

In addition, it is interesting to note that the numerical values of the key-names Rahab (**30** = 20 + 8 + 2), Jericho (**54** = 10 + 20 + 10 + 8 + 6) and Joshua (**58** = 10 + 5 + 6 + 21 + 16) appear in specific sections of the text in chapters 2-6. For this intriguing technique, see my book *Numerical Secrets of the Bible*, pp. 135-140 and the General [Introduction](#) to Logotechnical Analysis, pp. 13-15.
